

INSPIRE Validator - test selection

Test your INSPIRE data, services and metadata

1 - Select resource type

Select the type of INSPIRE resource you would like to test*

- ☐ Metadata (v.1.3, v.2.0)
- ☐ View Service (WFS, WMS)
- ☐ Download Service (Atom, WFS, SOS, WCS)
- ☐ Discovery Service (CRW)
- ☒ Data set

2 - Provide data source

Select the input type and provide the data source to fetch the resources to test*

The system can process multiple files at once. You can provide a link compressed ZIP files or service operation with requests to one or more records/features

Remote file 

Remote file

File upload

<https://myURL/myFileToBeTested.zip>

3 - Configure test options

Select the data themes contained in your data set

*If you are not interested in a specific theme, leave the boxes unmarked

- ☒ Addresses
- ☒ Administrative Units
- ☐ Cadastral Parcels
- ☐ Geographical Names
- ☐ Hydrography
- ☐ Protected Sites
- ☐ Transport Networks

Selected: Applications schema

Select the conformance classes to be assessed*

- ☒ Data consistency: General requirements
Source: Conformance Class 'Data consistency'
- ☒ INSPIRE GML application schemas: General requirements
Source: Conformance Class 'INSPIRE GML application schemas'
- ☒ Information accessibility: General requirements
Source: Conformance Class 'Information accessibility'
- ☐ Reference systems: General requirements
Source: Conformance Class 'Reference systems'

Would you like to provide your own label for the resulting report? (optional)

Organisation X - Test Metadata
