- Deployment Guide
- ETS development guide

Releases / Changelogs

Test your INSPIRE resources

Pick your resource (data, services or metadata), select the test(s) to launch and check the results to see how well you are doing (or where you need to improve).

Start a test

Go to the advanced test selector

API

If you are a developer, you can access and call the operations of the validator API to power your own applications.

Try the API

Want more?

Download the software, deploy it in your own infrastructure and customise it to fit your specific needs.

Get the software

Feedback

Use the Community space to provide your feedback or proposals on the ATS, ETS or the ETF test framework.
